

Handpuppets

Children love to roll play and what could be more fun than to create their own puppets and let their imagination run wild! They will have great fun making the show complete by telling a story about their own created puppets! Let the kids design their own hand puppets and make other animals, such as rabbits or a dog with chenille stems and whiskers. Let the show begin!

1 Using a piece of A5 cardstock, score lines lengthwise 1 cm and 8 cm. Fold along the score lines and glue this together along the 1 cm score line.

2 Score again the folded paper on the short side at 5,25, 10,5 & 15,75 cm.

3 Cut out a tongue (3 x 5 cm) and ears for the unicorn using cardstock paper and using the glitter paper cut out a horn. For the shark cut out a fin, tongue and make some teeth using glitter paper.

4 Glue all pieces together in place and decorate with rhinestones and wobbly eyes.
