## Cut Out Pretty Paper Snowflakes
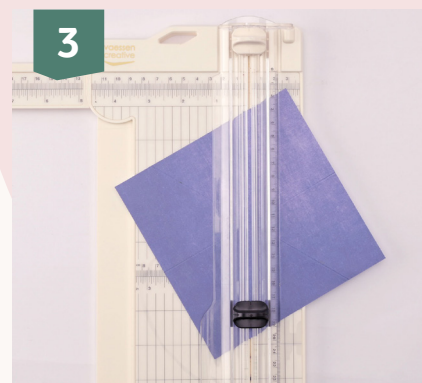

Cutting paper snowflakes is easy and fun! With a few simple folds, cuts, and a creative pattern, you can create a unique winter decoration.
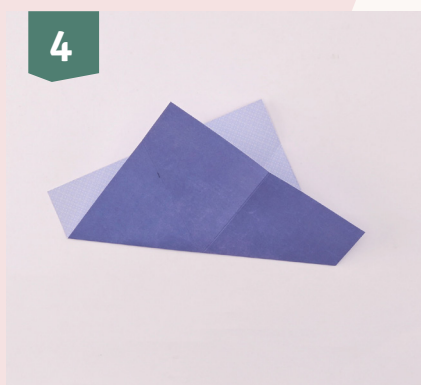

1

Cut a sheet of paper to 5.8 x 5.8 inch (14.8 x 14.8 cm) and score it in the middle at 2.9 inch (7.4 cm). Use thin paper, as cardstock is too thick for this project.
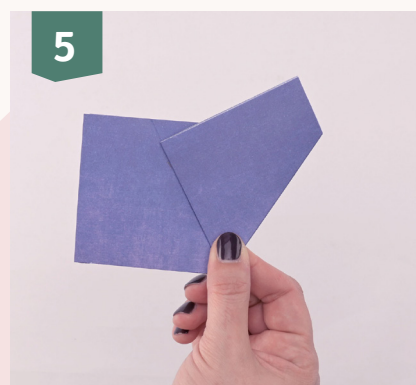

2

Place a set square in the centre on the scored line and mark points at 60 and 120 degrees. Flip the set square and repeat on the other side.

3

Align the marked points in a paper cutter and score diagonal lines.

4

Fold along all the scored lines.

5

First, fold the paper in half along the horizontal line, then fold one diagonal corner inward.

6

Next, fold the other corner inward, forming a cone-like shape.

7

Draw a pattern on the folded paper. If you want to make multiple snowflakes with the same design, create a template and trace it.

8

Cut out the pattern, erase any pencil marks, unfold the paper, and enjoy your handmade snowflake!
