

Sea glass mason jar

Bring the beach inside and store your favourite shells and stones in these decorative pots. Create a weathered beach look by treating glass objects with sea glass paint to make it look as though the glass has endured many years of sea and sand. This sea glass paint is easy to make yourself by mixing matt Mod Podge with paint in a colour of your choice. Complete the beach look by also crafting a sealable pot with a fun lid with a little fish on it.

1
Glue the Styrofoam fish onto the lid of the glass pot and leave to dry thoroughly.

2
Paint the fish lid. Apply a second layer once dry.

3
Mix matt Mod Podge with paint at ratio of 3:1.

4
Evenly apply the mixture to the glass pot, brushing in a single direction only all the way around.

5
Tie jute twine around the rim of the glass and decorate with shells. Place a LED tea light in this pot and fill the fish pot with shells and sea treasures.
