## Let's make a Christmas Lantern

Are you looking for a creative way to bring the Christmas spirit to your home?
Discover how to create your own enchanting Christmas lantern with stamps! In this Christmas-DIY, we'll show you how to craft a festive lantern with just a few supplies that will add warmth to your home during the holiday season.

1

Take the Stamp Easy Pro and attach the text stamps to the narrow stamping plate. Apply ink to the stamps. Take a sheet of A5-sized watercolour paper and stamp the text horizontally across the width of the paper.

2

Now, take the stamp with the image of Christmas trees and apply ink to it as well. Place the stamp above the text in a horizontal direction.

3

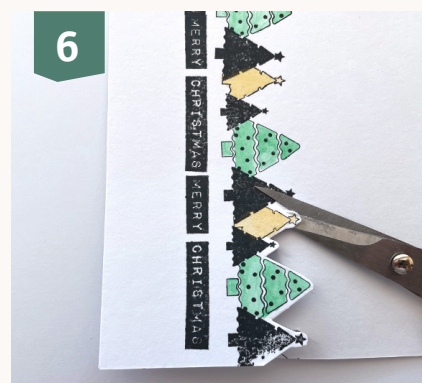

Adjust the paper so that you can nicely repeat the pattern of the Christmas trees.

4

Colour the Christmas trees using dye ink and a water brush pen.

5

Trim the paper 0.6 inches away from the stamped text.

6

Next, trim away the excess paper along the Christmas trees.

7

Fold the cut paper into a circle, ensuring the pattern aligns nicely. Trim the end that folds inside slightly shorter, and then secure it in place.

8

Complete the lantern by tying a ribbon around the white strip. To prevent it from shifting, apply a small drop of glue under the bow.
