

Last-Minute Gift Tags

Christmas crafting is the perfect way to create personal and unique decorations. With the Vaessen Creative gift tag set, embossing folders, a circle punch and cardstock, we'll show you how to make beautiful and unique gift tags in no time.

Grab white and black pearlescent cardstock paper from Florence and cut it to fit the dimensions of the embossing folder. Place the paper in the embossing folder with the wreaths and run it through an embossing machine.

Enhance the embossed paper with colour accents using a gold marker and a white gel pen.

Utilize a 45 mm-diameter circle punch and a 51 mm scalloped-edge circle punch to cut circles from the paper.

Take the round labels from the gift label set and affix the punched circles using glue or double-sided tape.

Repeat steps 1 through 4 for the embossing folder with the Christmas blocks, but this time cut rectangles from the pearlescent cardstock paper. Take the straight labels from the label set and attach the rectangles to them.

Lastly, suspend a piece of jute twine from the gift tags so that you can easily affix them to a gift.
