## Folding gift boxes with a cutting die

Discover the joy of crafting your own creative gift! Follow the steps in this DIY guide to create adorable gift boxes and learn how to fold them using a cutting die and paper. Add a personal touch to these mini gift packages and surprise your friends and family with a homemade wrapped surprise!

**1**

Pick an A5 sheet with a safari print and position the cutting die to cut out two shapes.

**2**

Fold all the scored lines after cutting the shapes twice. Keep the four 'waste' squares separate.

**3**

Adhere the two shapes together to form the base of the box.

**4**

Cut four rectangles measuring 3.5 x 4.5 cm from another sheet with safari print.

**5**

Decorate the boxes by affixing the cut rectangles and the previously saved squares.

**6**

Fold the sheet into a box and secure it with glue or double-sided tape.

**7**

Select a plain sheet of paper and cut out labels measuring 6 x 3 cm.

**8**

Stamp a fun message onto the labels.

**9**

Round the corners and make holes in the labels with a 3-in-1 corner punch.

**10**

Finally, seal the boxes with a piece of twine or ribbon and attach a label. Fill the boxes with something delightful or delicious!
