Crafting colourful fish

Creating a colourful fish is a breeze with this DIY project! All you need are acrylic paint, linen cardstock, and a few punches. Mix and match different paint colours and craft one cheerful fish after another! Where will you stick yours?

1

Take a sheet of linen cardstock and apply a thin layer of acrylic paint in colours you like.

2

Allow the cardstock to dry thoroughly, then punch out three scalloped ovals.

3

Score the ovals lengthwise and fold them in half, with the painted side on the inside.

4

Use double-sided tape to stick the unpainted sides of the ovals together.

5

Punch out a smaller oval from the linen cardstock for the bottom of the fish and attach it with double-sided tape.

6

Punch out two different hearts for the tail. Make a cut from the point to the middle of each heart and slide them over the fish. Secure with a bit of glue.

7

Punch out a small heart for the mouth and attach it to the opposite end in the same way as the tail. Cut a larger heart in half to create the fins and glue them in place.

8

Use a white pen to draw details on the fish, such as playful stripes along its body.

9

Apply Ranger Glossy Accents to give the fish a shiny, wet look.
