

Make an Easter garland with colourful eggs

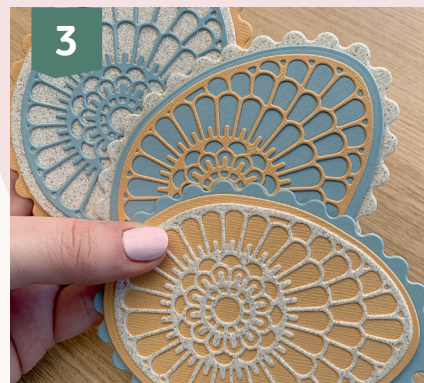

Bring colour into your home with this cheerful Easter garland! A perfect idea for Easter crafting: with some paper, die-cut shapes and string you can create a festive garland in no time.

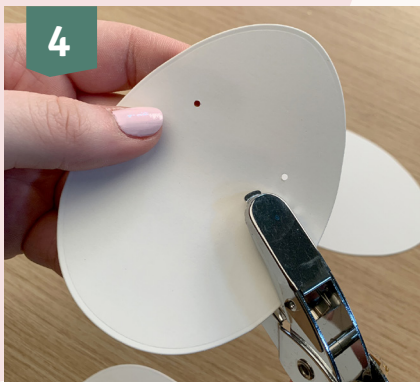

1 Choose three different colours of paper and die-cut each cutting die three times, so you have a set in each colour.

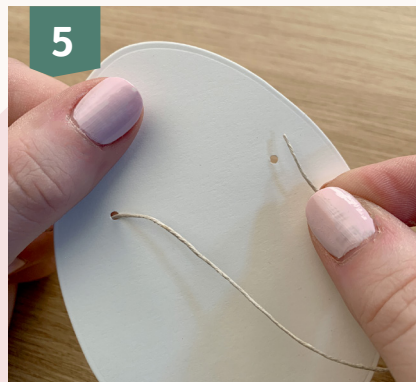

2 Create different colour combinations with the die-cut shapes and glue them together.

3 Use the standard egg-shaped die and cut out at least three eggs. (Of course, you can make the garland as long as you like!)

4 Punch two holes in each egg with a hole punch, as evenly aligned as possible.

5 Take a piece of sturdy hemp cord and thread it through the holes.

6 Attach the assembled eggs onto the white egg shapes.

Find the perfect spot and hang up your colourful garland!
