

## Birth Announcement Card with Flowers

Create a cute birth announcement card with flowers and a sweet message. This DIY card is perfect for welcoming a new baby!

1

Take a white sheet of cardstock paper and two sizes of flower punches with a daisy pattern. Punch out about 15 flowers with both punches.

2

Hold each flower separately in your hand and press the ball of an embossing pen into the centre. Gently twist the pen to make the petals rise.

3

Now combine the large and small flowers together and stick them with a drop of glue. Use Nuvo Crystal Drops to add small dots in the centre of the flowers.

4

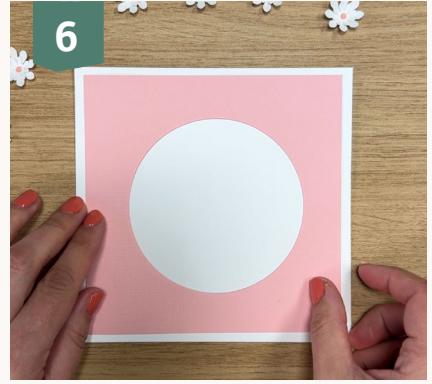

Take a sheet of pink linen cardstock and cut it to 5.5 x 5.5 inches (14 x 14 cm).

5

Cut a circle with an 4.3 inches (11 cm) diameter from the centre of the paper using a die-cutting machine.

6

Take a white 15 x 15 cm folded card and glue the linen cardstock with the cut-out circle onto it.

7  
Stamp the text "hello little one" with pink ink in the centre of the circle, using an acrylic block.

8  
Finally, glue the flowers around the edge of the circle to finish.
