

Crafting glasses with our craft kit

Make a fun and colourful foam pair of glasses with your child using the versatile craft kit from Vaessen Creative. In just 5 steps, you assemble the glasses, with decorating them as the most fun step, of course. Happy crafting!

1
Take a piece of foam in a bright colour and draw a pair of glasses on it. You can use a pair of children's sunglasses to get the size right.

2
Cut out the frame with a pair of child-safe scissors.

3
Then cut out the 'lenses.' First, make a small notch in the centre to insert the tip of the scissors and then cut out the lenses.

4
Take two foam lollipop sticks and attach them to the inside of the glasses frame with two split pins. To make the arms of the glasses bendable, you can create a small fold line with the blade of the scissors.

5
Finally, decorate the glasses with wiggly eyes, sequins, rhinestones, etc.
