

Craft a Butterfly using Wooden Beads

Wooden beads, jute twine, and cardstock are the perfect materials for creating a charming butterfly! With just a few simple steps, you can string, cut, and decorate this lovely decoration.

1 Tie a knot in a piece of jute twine and thread wooden beads onto both ends. The last bead (the head) should be slightly larger than the butterfly's body.

2 Apply some glue inside a small wooden bead using a hot glue gun, then slide it over the end of the twine.

3 Use a fine-tip marker to draw two eyes and a smile.

4 Fold a piece of cardstock in half and cut out a pair of wings.

5 Attach the wings to the wooden beads using a hot glue gun.

6 Decorate the wings with punched shapes, glitter, or pom-poms.
