

Craft jellyfish with craft kit

Create your own cheerful jellyfish using glitter paper, crepe paper, and googly eyes. A fun and colourful craft project for kids!

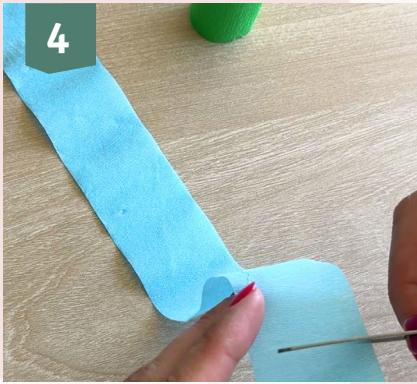

Choose two colours of glitter paper from the Vaessen Creative Fun Kit 2. Use a glass jar (about 2.5 inches/6.5 cm in diameter) to trace three circles on each sheet.

Cut out the circles neatly. Don't feel like cutting? Use a circle punch to punch out three circles from each colour.

Fold all six circles in half.

Take two colours of crepe paper and cut three strips of about 12 inches (30 cm) from each colour.

Fold a chenille stem in half, make a small loop in the center, and twist the two ends together.

Take one folded circle, apply glue to one side, and stick a strip of crepe paper to the bottom. Repeat with the other circles, alternating the colours.

7

Once all the strips are attached, add glue to the center of the circles and press the loop of the chenille stem onto it.

8

Glue the outer sides of the circles together to form a ball shape.

9

Finish your jellyfish by adding two googly eyes. Feel free to experiment with different colours – let your creativity run wild!
