

## Christmas card with wreath

Let your creativity shine with this festive Christmas craft project! Use pearlescent and glitter paper to create a radiant base, then add Glossy Accents and Liquid Pearls for a sparkling finish. Perfect for making your own Christmas card that truly stands out!

Take a sheet of grey pearlescent cardstock from the pad. Cut it to 4.1 x 8.2 inches (10.5 x 21 cm) and score down the middle of the long side. Fold in half to create a card measuring 4.1 x 4.1 inches (10.5 x 10.5 cm).

Cut a square of white glitter paper measuring 3.9 x 3.9 inches (10 x 10 cm).

From the same grey pearlescent paper, cut another square of 3.7 x 3.7 inches (9.5 x 9.5 cm). Place the layers on top of each other to see how they look together.

Take the 3.7 x 3.7 inches (9.5 x 9.5 cm) square. Draw a circle slightly below the centre. You can use a circle punch as a template for a neat round shape. Then gently erase the pencil line until only a faint guideline remains.

Along the circle's edge, apply Glossy Accents in both large and small drops. Allow this to dry for a while.

Continue with Liquid Pearls, dotting all the way around until a full wreath is formed. Let it dry and harden thoroughly before moving on.

7 Stamp a festive greeting in the centre of the circle.

8 Punch two holly leaves out of white glitter paper.

9 Make a small bow from silver satin ribbon. Attach the bow and holly leaves to the top of the wreath.

10 Finally, stick the grey sheet with the wreath onto the glitter paper, and then attach the glitter paper onto the folded base card.
