

## Make a paper Christmas star with a drop punch

Create a charming paper star Christmas crafting project using a teardrop punch. Use it as festive table décor, a tree ornament, or string several together for a beautiful Christmas garland.

1 Take an ivory-coloured A4 sheet of paper and cut it lengthwise in half.

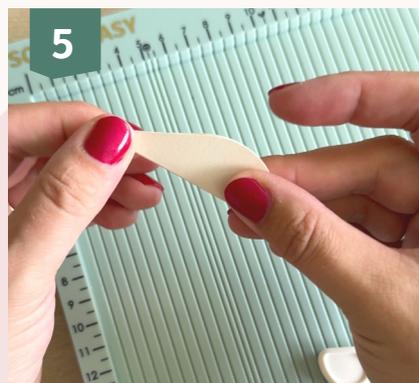

2 Use the teardrop punch to punch out 12 shapes from one strip of paper. Alternate sides: first on the left, then on the right, moving gradually down to use the paper efficiently.

3 Punch a small circle from the same strip as well.

4 Place each teardrop one by one on the Score Easy and score a line right down the middle.

5 Fold the teardrops in half along the score line.

6 Place the first drop face up and apply a small amount of glue to the bottom right corner.

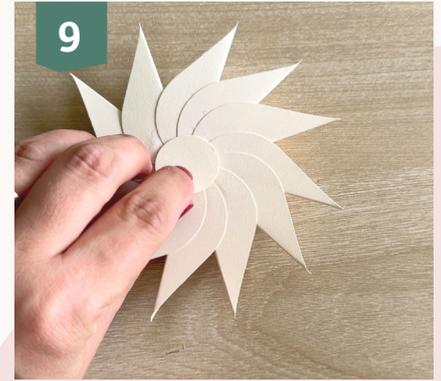

Stick a second teardrop on top, open it, add glue, and stick on the next teardrop.

Repeat this until you are almost all the way round. For the last teardrop, add some glue inside first, then stick it in place to close the star.

Finally, glue the small punched circle to the back of the star for extra strength. At the front, you can leave the half-teardrops slightly raised for a playful effect.
