

## Make an album using envelopes

Get creative with envelopes and create a playful, personal album full of surprises. An original Valentine's project to keep memories or give as a gift.

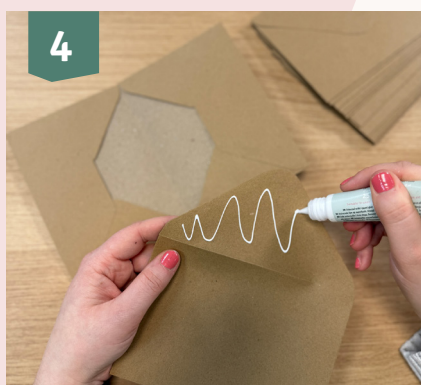

1  
Open two envelopes and apply glue to the outside of one envelope.

2  
Slide this envelope into the other one.

3  
Now glue the other flap to the back.

4  
For the next page, apply glue to the outside of another envelope.

5  
Slide this envelope into the left envelope.

6  
For the following page, do the same but slide the envelope into the right side.

Repeat this process as many times as you like. For this project, we are using six envelopes in total.

Here are a few ideas for the contents:

For example, create a removable label and a pocket for photos. You can punch the inside open to make it easier to add photos.

Use vellum for a playful effect, such as with confetti.

Repeat certain shapes throughout the project to create a cohesive and attractive look.

Glue down flaps or use split pins for a surprising effect. This also makes the album a lovely gift.
