

Create a Winter Candle Holder

Create a charming tealight holder with glitter and stars! Using vinyl, salt, and Mod Podge, you can make this lovely snow-covered candle holder for your home.

Take a strip of removable vinyl and punch out a few star shapes.

Grab a clean glass jar. Use a hook to remove the backing from the vinyl and stick the vinyl stars onto the jar as desired.

Fill a small container with a layer of (kitchen) salt and add glitter to it. Mix until you're happy with the amount of glitter.

Apply a layer of matte Mod Podge onto the jar using a foam brush. Try to keep the vinyl stars mostly free from the Mod Podge.

Work quickly! Use a spatula to sprinkle the salt mixture over the Mod Podge. Then, apply Mod Podge to the next section and repeat until the whole jar is covered with the salt mixture.

Let it dry thoroughly, then tap off any excess salt mixture. Carefully remove the vinyl stars with the hook. Optionally, wrap a piece of ribbon or string around the top to finish off the tealight holder.
