

Elegant wedding card with a floral heart

Looking for inspiration to make a beautiful wedding card? In this project you create an elegant card with a delicate heart made from paper flowers. It's a lovely idea for anyone who enjoys card making.

1
Cut a 5.1 x 10.2 inches (13 x 26 cm) card base from linen cardstock and score it at 5.2 inches (13 cm) to create a folded card. Then cut a square panel measuring 4.3 x 4.3 inches (11 x 11 cm) from the same cardstock.

2
Punch several flowers from double-sided coloured paper.

3
Place a flower in the palm of your hand and gently press the centre with an embossing tool to create a nice 3D effect.

4
Glue the flowers onto the square panel in the shape of a heart. Tip: start at the bottom so the heart stays nicely symmetrical.

5
Add a self-adhesive pearl to the centre of each flower.

6
Tie a piece of hemp twine around the panel with the floral heart.

Stamp a sentiment below the heart on the panel.

Apply foam tape to the back of the panel.

Finally, attach the panel to the folded card base.
