

Christmas Tree Advent Calendar

Create an original Christmas tree advent calendar with a special Christmas tree cutting die. Fill the mini Christmas trees with sweets, small gifts or little notes, and count down to Christmas!

Choose three shades of green cardstock and one sheet of brown cardstock. Use the smallest cutting die from set 3625-0611 for the lightest shade. The darker the cardstock, the larger the cutting die you use.

Decide how many trees you would like to make. Die-cut the required number of shapes from each cutting die and each colour of cardstock.

Stamp the advent numbers onto the lightest green shape using (black) ink.

Fold along all the score lines. Use a bone folder to create crisp, neat folds.

Glue the three green shapes together to form separate tree sections.

Apply small pieces of foam tape to the top of the two darkest green tree sections so you can layer them later.

Stack the tree sections, fill them with a small gift or a sweet treat, and glue the brown base to the inside of the darkest green tree section. Your mini Christmas tree advent calendars are now complete! Decorate them further if you wish.
