

## Graphic pattern layout

Create a captivating graphic piece for your wall! In this DIY guide, we'll show you step by step how to craft a stylish layout using Distress Oxide ink and a stamp with a graphic pattern from our Love It collection. Mount your creation on a canvas or attach it to a wall rack with clips.

1 Secure a sheet of smooth white cardstock to your work surface with (washi) tape. Use a spray bottle with water and mist the entire cardstock sheet until it's thoroughly moist.

2 Apply 2 or 3 colours of Distress Oxide ink using an ink applicator. Let the colours blend by applying them in a swirling motion, then allow them to dry thoroughly.

3 Use one of the Distress colours to stamp the graphic pattern onto the cardstock.

4 Immediately after stamping, sprinkle gold glitter embossing powder over the still wet ink. Work quickly, as the powder won't adhere once the ink is dry.

5 Use a heat tool to set the embossing powder.

6 Rotate the stamp and the cardstock so that the pattern aligns again. Repeat steps 3 to 5 until the entire sheet is covered with the graphic pattern.

Use a filled water brush to pick up the ink and colour random sections of the stamped pattern.

Trim the white edges of your paper and then cut it to a size of 29.5 x 29.5 cm.

Take another sheet of white cardstock and stamp a text onto it.

Spray water on the other half of the paper and apply ink in a swirling motion.

Now, cut two banners, one from the blended paper and one from the stamped paper. Adhere them together with foam tape and then onto the larger cardstock sheet.
