

## Making a card with layered stencils

Making your own cards is a creative journey! Layer by layer, you build up this card. Use a 'layered stencils' set and choose two ink colours of your liking to create a beautiful pattern. Add a lovely quote to complete the card.

Place a sheet of A4-sized white watercolour paper on a work mat or stamping platform. Position the first stencil on top and apply ink using a blending tool.

Take the second stencil and place it directly over the ink applied earlier. Opt for a different ink colour for the second layer. Start blending from the middle of the flowers using the blending tool to create a gradient effect.

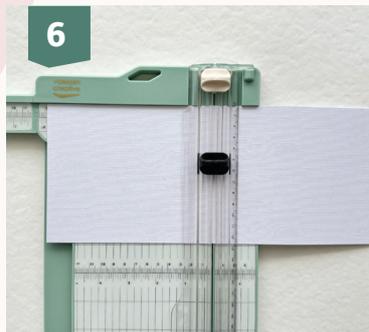

Next, lay stencil number three on the work surface and apply the first ink colour again. Repeat this process with stencil number four, using the colour from step 2.

Use one ink colour to create a blended spot on the sheet where stencilling was done. Stamp a text on it using the other colour.

Cut out or trim this text, optionally using an embossing machine.

Cut a sheet of white cardstock to 12.5 x 29.7 cm and score it in the middle at 14.8 cm.

Cut a sheet of pink cardstock to 11.5 x 14.8 cm and trim the stencilled work to 10.5 x 14.8 cm.

Finally, assemble all the components to create a beautiful card. Attach the text using 3D foam tape for added depth.
