**Computer Engineering**  
**Report on – ACM Kick-Off: WebDev and Beyond**

**Title:** *ACM Kick-Off: WebDev and Beyond*

**Date:** 6<sup>th</sup> August 2025

**Time:** 11:00 a.m. – 1:00 p.m.

**Venue:** Computer Centre 1 & 2

**Target Audience:** **S.E.**

**No. of Participants Present:** 42

**No. of Girl Participants Present:** 19

**No. of Boy Participants Present:** 23

**Resource Person:** Ms. Rucha Tatkare

**Organization of Recourse Person:** ACM Student Chapter

**Organizing Department / Committee / Authority:** ACM Student Chapter

**Faculty Coordinator:** Ms. Priya Kaul

**Objectives:**

- ❖ To build upon the foundational web development concepts introduced during the ACM KickOff workshop.
- ❖ To provide students with hands-on experience in working with advanced CSS properties including div layout elements and Flexbox.
- ❖ To help participants develop aesthetically appealing and structurally sound web frontends through guided practical sessions.

**Outcomes:**

- ❖ Students gained practical understanding of CSS styling, layout structuring using div, and implementing responsive designs using Flexbox.
- ❖ Participants were able to independently apply these concepts to build visually appealing website interfaces.
- ❖ The interactive format enabled peer learning, with students receiving immediate help and feedback from the ACM team.

### Detailed Report:

The **ACM-DBIT Student Chapter** conducted a continuation workshop on **Web Development: Hands-on with CSS and Flexbox** for Second Year (S.E.) students on **the 6<sup>th</sup> of August 2025** at **11:30 AM** in **Computer Centre**. This session was a natural progression from the previous "ACM KickOff" workshop and focused on strengthening students' CSS skills through guided practicals.

The workshop was spearheaded by **Joshua Almeida**, Technical Head of ACM-DBIT. Joshua led the students through advanced CSS concepts with a focus on real-time experimentation. Key topics included working with div elements, layout manipulation, and the use of **Flexbox** for responsive and structured designs. Under his guidance, students developed frontend layouts that were both creative and cleanly styled.

Throughout the session, the rest of the ACM team played an instrumental role by moving around the room, helping students debug issues, clarify doubts, and ensure that everyone was keeping up with the workshop pace. This created a highly collaborative learning atmosphere. Which was highly appreciated among the student peers.

Later in the session, **Verushka Fernandes**, Secretary of ACM, took over the instruction and continued building upon the website project initiated by Joshua. Her segment emphasized refining the structure and further customizing the design using CSS properties discussed earlier.

To make things more engaging and Interesting, a short quiz was taken, with basic questions pertaining to the workshop, with small prizes being given out to the correct answers.

The workshop concluded with a round of feedback from the participants, who shared highly positive responses. Students appreciated the hands-on nature of the session and expressed interest in further deep-dive workshops into web development and project building.

The event was a success in igniting interest among second-year students regarding web development and project ideation. The vibrant and interactive environment ensured active participation from all attendees. Students were highly engaged throughout the session, experimenting with the newfound tools that were the CSS properties.
