

14th Young Chemists Symposium Ruhr – Electrifying Chemistry –

You want to present your thesis or research as a poster? You want to meet other chemists from the Ruhr area? You want to know what moves the German chemical industry today? Join us at this year's Young Chemists Symposium Ruhr!

Our three keynote speakers **Prof. Dr. Patrick Théato** (KIT), **Prof. Dr. Ulf Peter Apfel** (RUB) and **Dr. Sebastian Beil** (MPI CEC) cannot wait to share their findings and experiences with us and we have prepared talks, a poster session, workshops and plenty of networking opportunities for you!

We would be so happy to see you in Wuppertal on **4th September 2026**,
so we can electrify chemistry together!
